The text is not legible due to the image quality. However, it appears to be discussing real and synthetic data related to various enzymes and their activities. The diagrams show box plots and line graphs comparing different conditions or datasets, possibly related to biological or chemical activities.

A (real data)
B (synthetic data with std = 0.1)
C (synthetic data with std = 0.01)
D (synthetic data with std = 0.001)
